# CAMPUS FESTIVAL REGISTRATION AND FINANCIAL AUDIT

## 1. Algorithm

1. Start the program.

2. Initialize participant names, registration fee, sponsorship contributions, and festival expenses.

3. Create an empty list called **unique_participants**.

4. Check each participant using a **for** loop:

- If the name is not in the unique list, add it.

- Otherwise, display a duplicate registration message.

5. Calculate the number of unique participants.

6. Calculate registration income: Unique Participants × Registration Fee.

7. Calculate total sponsorship contributions using **sum()**.

8. Calculate total festival expenses using **sum()**.

9. Calculate total income: Registration Income + Sponsorship Income.

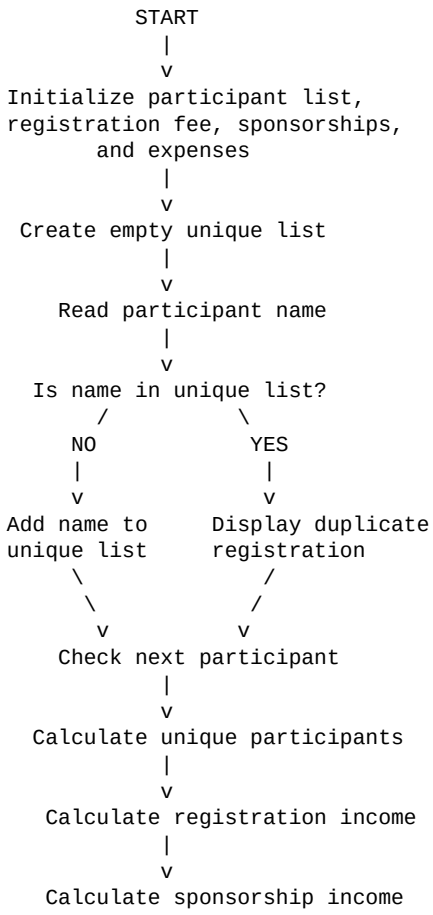
10. Calculate final balance: Total Income – Total Expenses.

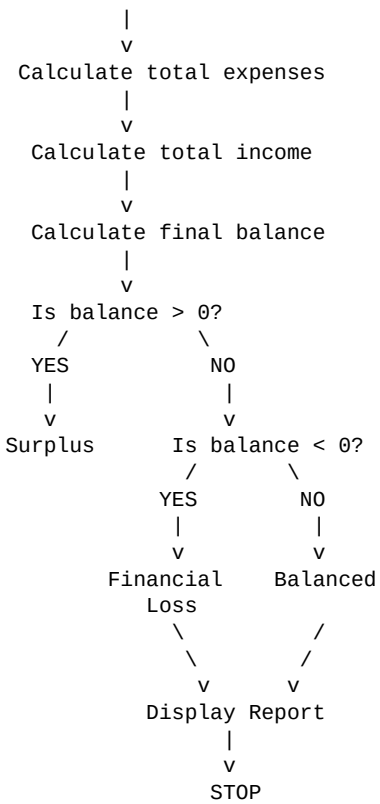
11. Display the festival audit report.

12. If balance is positive, display surplus; if negative, display financial loss; otherwise, display that accounts are balanced.

13. Stop the program.

## 2. Flowchart





## 3. Pseudocode

```
BEGIN
    PRINT "CAMPUS FESTIVAL REGISTRATION AND FINANCIAL AUDIT"

    INITIALIZE participants = ["Ravi", "Sita", "Rahul", "Priya", "Ravi"]
    SET registration_fee = 500
    INITIALIZE sponsorships = [5000, 3000, 2000]
    INITIALIZE expenses = [4000, 2500, 1500]

    CREATE empty list unique_participants

    FOR each name in participants DO
        IF name is NOT in unique_participants THEN
            ADD name to unique_participants
        ELSE
            PRINT "Duplicate registration detected:", name
        END IF
    END FOR

    SET total_participants = LENGTH(unique_participants)
    SET registration_income = total_participants * registration_fee
    SET total_sponsorship = SUM(sponsorships)
    SET total_expenses = SUM(expenses)
    SET total_income = registration_income + total_sponsorship
    SET final_balance = total_income - total_expenses

    PRINT "FESTIVAL AUDIT REPORT"
    PRINT total registrations
    PRINT unique participants
    PRINT duplicate registrations
    PRINT registration fee
    PRINT registration income
    PRINT total sponsorship
    PRINT total income
    PRINT total expenses
    PRINT final balance

    IF final_balance > 0 THEN
        PRINT "Festival has a surplus."
    ELSE IF final_balance < 0 THEN
```

```
        PRINT "Festival has a financial loss."
    ELSE
        PRINT "Festival accounts are balanced."
    END IF
END
```

## 4. Sample Output

```
CAMPUS FESTIVAL REGISTRATION AND FINANCIAL AUDIT
------------------------------------------------
Duplicate registration detected: Ravi

--------- FESTIVAL AUDIT REPORT ---------
Total Registrations: 5
Unique Participants: 4
Duplicate Registrations: 1
Registration Fee: Rs. 500
Registration Income: Rs. 2000
Sponsorship Contributions: Rs. 10000
Total Income: Rs. 12000
Total Expenses: Rs. 8000
Final Financial Balance: Rs. 4000
Result: Festival has a surplus.
```

## 5. Result

The Campus Festival Registration and Financial Audit program was successfully executed. It identifies duplicate registrations and calculates registration income, sponsorship contributions, total expenses, and the final financial balance. The festival has a surplus of **Rs. 4,000**.

## 6. Concepts Used

• Lists

• for loop

• if-else conditions

• if-elif-else statements

• sum() function

• len() function

• List membership (in)

• Arithmetic operations
